

## **Melissi 4 main features:**

- Classroom sessions with up to 40 students
- Multi-purpose room – not dedicated language lab
- Software-only solution requiring no additional hardware, servers, or cabling
- High quality audio and video playback, including re-sizable and full-screen video
- Any audio/video format can be played with appropriate codecs installed
- Fast simultaneous transfer of materials to students with simple drag and drop
- Subtitling
- High quality networked telephone system
- Call class or group
- Listen to individuals or talk to them
- Unlimited groups
- Automatic random groups of up to six students
- Conference calls
- Forum with unlimited topics
- Text (pseudo email) system
- Bookmarks
- “Clip” files can use a subsection of a longer audio or video track
- “Activity” files can contain instructions and audio/video files, text files and pictures
- Tightly synchronised speech recording whilst audio/video files are playing
- Variable speed playback without pitch change
- CD track extraction
- Audio compression to MP3 or Ogg Vorbis
- Permanent Class system allows teachers to “publish” work to their students
- Self-access and offline modes for students
- Unicode word processor with full support for all world languages
- Staff can view student screens, use their mouse and keyboard, send their own or student screens to the class
- Secure mode locks out students from non-permitted activities for tests
- NEW – Simultaneous Interpretation suite emulation, including Relay
- Staff can gather all student work files remotely
- Easily-created “Web links” allow staff to send URLs to students
- Materials easily stored on classroom staff computer or a central computer serving multiple classrooms
- Ability to aggregate up to 40 student computers from a variety of locations into one session
- PHP scripts to allow students to download materials from a web server within Melissi
- Modularised system allows for “plug-ins” to handle new data types
- Flexible licensing allows for campus-wide or home installation of self-access student program for small annual licence fee
- Ability to append Activity collections to media files for easy web deployment – no Mime type changes needed
- Staff can shut down student computers remotely at the end of a session
